Education

Manipal Institute of Technology (MIT)

B.Tech in Computer Science and Engineering (CSE)

2022 - 2026

Karnataka, India

Experience

CocoIndex (800+ stars — Open-Source ETL for AI Data)

Apr 2025 – Present

Core Contributor, mentored by ex-Google Tech Lead — Rust, Python

San Francisco (Remote)

- Added Gemini LLM integration in Rust, enabling next-generation AI data enrichment and semantic indexing at scale (PR #360).
- Refactored core engine to adopt `bytes : Bytes`, reducing memory overhead and boosting concurrency for real-time indexing pipelines (PR #330).
- Enhanced developer experience by introducing colorized CLI status outputs, improving visibility for live data operations (PR #329).
- Developed comprehensive unit tests for Python - Rust data interchange, ensuring data integrity across 10k+ daily CI runs (PR #328, PR #315).

Web Globe India

Dec 2024 – Jan 2025

Backend Intern - Node.js, Redis, Kafka, WebSockets, Docker, GitHub Actions

Gurugram, India

- Scaled REST APIs, WebSockets using Kafka and Redis, handling 1000+ concurrent requests with latency under 5ms.

Invisible Mechanics (Acquired by Unacademy)

Aug 2024 – Nov 2024

Founding Engineer - TypeScript, Python, LangChain, AWS, Docker

Bengaluru (Remote)

- Worked closely with the CTO to create AI Agents that personalized learning for over 12,000 users, automating tasks to improve educational efficiency by 40%. Scaled the platform ensuring performance and reliability

Indian Oil Corporation

May 2024 – July 2024

Software Engineering Intern - MongoDB, Express, React, Node

Delhi, India

- Engineered a scalable web app to manage cartridge inventory, increased efficiency, reducing tracking time by 50%

Projects

buztop | Scalable Newsletter App (Next.js, AWS Queues, Resend)

- Built an open-source scalable newsletter app as a no-cost replacement for SubStack. CMS with AI Post creation.

dsa90 | Dynamic Learning Platform (React, Golang, Docker, Firebase)

- Authentication, AI-powered features and a rich text editor for enhanced note-taking. Over 200 daily users, powered by a Go microservice to automatically fetch metadata from the playlist.

VerbAI | AI Voice Agents (Next.js, Python, PyTorch, FastAPI, Docker, AWS S3)

- Scalable AI voice agents with real-time text-to-speech, and custom voice generation APIs with 90% faster synthesis

Open Source Contributions

ReacherHQ (Rust) - Implemented a feature to prune DB of bulk emails, scripted in Rust (PR).

NautilusTrader - Rewrote Order handling logic using async Rust/Tokio and Go concurrency.

Skills Summary

Languages - Go, Rust, Python, TypeScript, Bash, SQL.

Frameworks and Runtimes - Next.js, FastAPI, Node.js, gRPC.

Tools - Redis, Docker, Kafka, PostgreSQL, BullMQ, WebSockets, AWS.

Leadership Experiences, Volunteering, Awards and Achievements

Core Committee Member - ACM Student Chapter, Manipal: Led workshops impacting over 1,000 students on Linux and Bash scripting. Authored blog posts that received 300+ views.

President - Linux User Group (LUG): Conducted workshops and mentored peers - 200+ members

First Position - Vigyantram, IIT Bombay: Secured first place in a cybersecurity competition.

Gold Medalist - National Cyber Olympiad (NCO): Achieved Zonal Rank 7 among over 10,000 participants.
